A) Authorization for this examiner's amendment was given in a telephone interview with Applicant's Attorney, Alan K. Aldous, on July 25, 2003.

The Specification has been amended as follows:

On p.16, line 23: "P55" has been changed to --P61--.

On p.16, line 24: "P57" has been changed to --P63--.

On P.16, line 24: "P58" has been changed to --P64--.

B) Additionally, the Examiner has noted and corrected minor grammatical errors in Claim 21 in order to agree with the plural "terminations" as follows:

In amended Claim 21, line 13: "an" has been deleted.

Information Disclosure Statement (IDS)

3. In the Form PTO-1449 of the IDS filed December 30, 2002 (filed as Paper No. 1202b), the listed patent number corresponding to Fan et al. was corrected by the Examiner from "6,981,164 B1" to --6,381,164 B1--.

Allowable Subject Matter

4. Claims 1-29 have been allowed.

5. The following is an examiner's statement of reasons for allowance:

As to Claims 1-15, patentability resides in **the combination of a first path of conductors, as claimed, that terminates on the module terminations of the second module and a second path of conductors, as claimed, that terminates on the module terminations of the first module**, in further combination with the other limitations of base Claim 1.

As to Claims 16-20, patentability resides in that *the second path includes a second end for interfacing with the controller and the second path does not interface with a module between the second end and the second module*, in combination with the other limitations of base Claim 16.

As to Claims 21-29, patentability resides in the limitation wherein *a first section of the second path, which is a short loop through section, couples to stubs for third and fourth chips of the second module and a section of the second path couples to stubs for third and fourth chips of the first module*, in combination with the other limitations of base Claim 21.
